# supabase

## Company Overview

**Supabase** is a privately held, open-source Backend-as-a-Service (BaaS) company founded in 2020 by CEO Paul Copplestone and CTO Ant Wilson, originally incubated through Y Combinator. Headquartered in San Francisco, California, the company positions itself as the open-source alternative to Google's Firebase, built entirely on PostgreSQL and designed to give developers a production-ready backend without vendor lock-in. As of 2026, Supabase employs approximately 124 people globally and serves over 4 million developers managing more than 3.5 million databases worldwide.

In October 2025, Supabase closed a \$100 million Series E funding round led by Accel and Peak XV Partners, with participation from Figma Ventures, pushing its valuation to \$5.1 billion and total funding raised to over \$508 million. The company achieved this valuation, having grown from \$2 billion just four months prior, underscoring the explosive demand for developer-first, open-source infrastructure platforms. Its annual revenue reached approximately \$16 million in 2024 with projections of \$27 million for 2025.

## Products and Services

- **Postgres Database**, dedicated, fully managed PostgreSQL instance per project with support for relational data, advanced SQL, and Row-Level Security (RLS)
- **Authentication**, built-in auth supporting email/password, OAuth providers, magic links, phone OTP, and JWT session management
- **Auto-generated APIs**, instant RESTful and GraphQL APIs generated directly from your database schema, requiring zero manual configuration
- **Real-time Subscriptions**, live data updates delivered via WebSockets for collaborative and event-driven applications
- **Storage**, S3-compatible object storage for managing files, images, and large assets with integrated access policies
- **Edge Functions**, globally distributed serverless functions built on Deno for low-latency custom logic at the edge
- **Vector & AI Toolkit**, native pgvector integration for storing and querying embeddings, enabling RAG pipelines and semantic search
- **Supabase Studio**, a visual management dashboard for schema editing, table relationships, query building, and database cloning

# KEEPER<sup>®</sup>

## Company Overview

**Keeper Security, Inc.** is a privately held cybersecurity company founded in 2011 and headquartered at 333 North Green Street, Chicago, Illinois. The company was co-founded by Darren Guccione (CEO) and Craig Lurey (CTO), who continue to lead the business today. Backed by growth equity investors Summit Partners and Insight Partners, Keeper employs approximately 764 people across five continents, with regional offices including an Asia-Pacific headquarters in Tokyo, and generates an estimated \$73.5 million in annual revenue.

Originally launched as a consumer password manager, Keeper has evolved into a comprehensive enterprise cybersecurity platform centred on zero-trust and zero-knowledge architecture. In 2025, Keeper was recognised in the Gartner Magic Quadrant for Privileged Access Management, named a Value Leader in the EMA PAM Radar Report, and ranked Overall Leader in GigaOm's Password Management Report for the fourth consecutive year. The platform holds FedRAMP High, GovRAMP High, ISO 27001/27017/27018, FIPS 140-3, SOC 2 Type II, and PCI DSS certifications.

## Products and Services

- **KeeperPAM**, cloud-native privileged access management combining password management, secrets management, session recording, zero-trust network access and remote browser isolation in a single unified vault
- **Keeper Business/Enterprise Password Manager**, zero-knowledge vault for secure password and passkey storage, sharing and autofill with role-based access control and compliance reporting
- **Keeper Secrets Manager**, API-driven secrets management for DevOps and CI/CD pipelines, eliminating hard-coded credentials
- **Keeper Connection Manager**, agentless remote access to SSH, RDP, databases and Kubernetes endpoints without a VPN
- **KeeperMSP**, multi-tenant password and PAM platform purpose-built for managed service providers with RBAC, SIEM integration and GDPR/HIPAA/CCPA compliance tooling
- **BreachWatch**, continuous dark web monitoring that alerts users when credentials appear in known breach databases
- **Endpoint Privilege Management**, least-privilege enforcement and just-in-time access controls across workstations and servers

## Supabase Review

**Supabase** is widely recognised across the developer community as one of the most capable and accessible open-source backend platforms available today, praised in particular for its speed of setup, comprehensive documentation, and the depth of its Postgres feature set. On G2, it holds a strong 4.7 out of 5 stars from verified enterprise and developer reviews, with users consistently highlighting seamless database management, auto-generated APIs, and the quality of its real-time capabilities as standout strengths.

## Keeper Security Review

**Keeper Security** is well-regarded across both analyst and peer-review communities. Its 2025 Gartner Magic Quadrant inclusion for PAM validates its enterprise credentials, and Gartner Peer Insights hosts verified customer reviews specifically for Keeper in the PAM market category, covering deployment, usability, and support quality. Reviewers consistently highlight the ease of integration and configuration, the quality of Keeper support, and the platform's ability to simplify what was traditionally a complex PAM deployment.

On G2, Keeper holds a 4.6 out of 5 star average across 1,205 verified reviews as of early 2026, with 96% of users awarding 4 or 5 stars and 92% stating they would recommend the product. Enterprise reviewers in particular commend the elimination of unsanctioned credential storage, the audit trail capabilities, and the Security Audit reporting features that surface weak or reused passwords across the organisation.

## Company Overview

**Factorial** is a privately held, Barcelona-based HR and business management software company founded in 2016 by Jordi Romero (CEO), Bernat Farrero, and Pau Ramon Revilla. Built on the premise that SMEs waste enormous time on manual administrative tasks, Factorial grew rapidly into one of Europe's most prominent HR tech platforms, reaching unicorn status in October 2022 following its Series C round, which valued the company at over \$1 billion. In March 2025, Factorial secured an additional \$120 million in non-dilutive funding from General Catalyst, bringing total funding to approximately \$219 million, with the capital earmarked to accelerate sales, marketing, and European market expansion.

Today, Factorial serves more than 13,000 businesses across 60+ countries and is actively scaling its workforce from approximately 900 towards 1,300 employees. The platform has evolved well beyond its HR origins into a true all-in-one business management suite, with a strategic partnership with Microsoft Azure and OpenAI underpinning its AI-enhanced capabilities. The company is aggressively expanding into Germany, France, and Italy, and its CEO has stated confidence that Factorial will not require further equity rounds, projecting revenues exceeding \$100 million from Italy alone in 2025.

## Products and Services

- **Core HR & Employee Database**, centralised employee records, org charts, document management, and digital personnel files
- **Payroll Management**, integrated payroll processing, payslips, variable remuneration, salary review, and bank transfer file generation
- **Time & Attendance Tracking**, clock-in/out, timesheets, shift management, overtime calculation, and scheduling
- **Leave & Absence Management**, holiday calculation, PTO tracking, absence registration, and flex-time management
- **Recruitment & ATS**, applicant tracking, offer management, job posting, and candidate pipeline management
- **Onboarding, automated onboarding workflows**, task lists, and new hire documentation
- **Performance Management, 360-degree feedback**, performance appraisals, goal tracking, peer and self-assessments, and review cycle automation
- **Talent & Learning Management**, skills development, training packages, career planning, and certification tracking
- **Expense Management**, expense reporting, travel and allowances, financial tracking, and ERP import files

- **Document Management & e-Signatures**, electronic signature, digitised personnel archives, and forms management
- **Analytics & Reporting, HR KPI dashboards**, workforce planning insights, and customisable report generation
- **Employee Self-Service Portal**, mobile-friendly employee portal with push notifications, multi-language, and multi-currency support
- **Project Management**, task scheduling, billable hours tracking, project accounting, and client management
- **Integrations & API**, robust open API, SSO, third-party integrations, and ERP connectivity

## Factorial Review

**Factorial** holds strong ratings across leading peer review platforms, with a 4.5-star rating on both G2 and Capterra, reflecting consistently positive sentiment around its intuitive interface, ease of onboarding, and breadth of HR automation features. Enterprise and SME reviewers on Capterra highlight the platform's ability to replace fragmented spreadsheets with a single source of truth, with many citing time savings of several hours per week in HR administration and praising the seamless employee self-service experience. The platform's all-in-one nature, covering everything from recruitment through to payroll and performance reviews within a single environment, is the most frequently cited advantage across verified user reviews.
