Company Overview

Founded in 1985 and headquartered in Oxford, United Kingdom (with its principal global offices in Abingdon, Oxfordshire), Sophos is a British cybersecurity company and one of the longest-standing names in the industry. Originally focused on antivirus and encryption, the company has evolved into a full-spectrum cybersecurity services and technology provider. In March 2020, Sophos was acquired by Thoma Bravo, an American private equity firm, taking it private from the London Stock Exchange where it had been listed since 2015. Today, Sophos employs approximately 3,747 people worldwide and protects more than 600,000 organisations globally.

Sophos positions itself today as an AI-driven Cybersecurity-as-a-Service (CSaaS) leader, combining advanced machine learning, deep human expertise, and a unified management platform, Sophos Central, to deliver 24/7 threat prevention, detection, and response. Its internal threat intelligence unit, Sophos X-Ops, brings together over 500 experts across SophosLabs, Sophos Security Operations, and Sophos AI, giving the company a formidable research-led edge. Sophos is notable for being the only vendor named a Gartner Peer Insights Customers' Choice simultaneously across Endpoint Protection, Network Firewalls, and Managed Detection and Response.

Products and Services

- **Sophos MDR (Managed Detection and Response)**, 24/7 threat hunting, detection, and response delivered as a fully managed service
- **Sophos Endpoint (Intercept X)**, next-generation endpoint protection combining AI, anti-ransomware, and deep learning
- **Sophos XDR (Extended Detection and Response)**, cross-product threat correlation across endpoints, servers, firewalls, and email
- **Sophos EDR (Endpoint Detection and Response)**, deep endpoint visibility for threat hunting and incident investigation
- **Sophos Firewall (XGS Series)**, next-generation network firewall with AI threat detection, Zero Trust access, and deep packet inspection
- **Sophos NDR (Network Detection and Response)**, network traffic analysis for detecting hidden and lateral threats
- **Sophos ZTNA (Zero Trust Network Access)**, identity and device-verified access control replacing traditional VPN models
- **Sophos ITDR (Identity Threat Detection and Response)**, protection against identity-based attacks and credential abuse

Company Overview

Mimecast is a British cybersecurity company founded in 2003 by Peter Bauer and Neil Murray, and headquartered in London, United Kingdom, with its US headquarters in Lexington, Massachusetts.

Originally built as a cloud-based email management platform for Microsoft environments, the company has since evolved into a comprehensive Human Risk Management (HRM) platform spanning email security, collaboration protection, insider risk, data compliance, and security awareness training. In May 2022, Mimecast was taken private by Permira, a global private equity firm, in an all-cash transaction valued at approximately \$5.8 billion. The acquisition of Code42 Software in July 2024 further strengthened Mimecast's insider risk and data protection capabilities.

Today, Mimecast serves more than 42,000 customers across 100+ countries and employs over 2,000 people globally.

The company operates 13 offices worldwide, including in Johannesburg and Cape Town, South Africa, as well as data centres in the United States, Canada, United Kingdom, Germany, Australia, and South Africa.

Under CEO Marc van Zadelhoff, who joined in January 2024 with prior experience as CEO of Devo Technology and GM/CEO of IBM Security, Mimecast is executing a channel-first growth strategy with a strong focus on AI-powered threat intelligence and human-centric security

Products and Services

- **Advanced Email Security**, AI-powered protection against phishing, malware, impersonation, and sophisticated email-borne threats
- **Engage Security Awareness**, continuous, behaviour-based security awareness training to reduce human risk and build employee cyber resilience
- **Incydr Data Protection**, insider risk and data loss prevention safeguarding IP, source code, and customer data from theft or accidental loss (acquired via Code42)
- **Aware Governance & Compliance Suite**, data governance and compliance protection across collaboration platforms, including Slack and Microsoft Teams
- **Collaboration Threat Protection**, defence against cyberattacks launched through Microsoft Teams, OneDrive, and SharePoint
- **DMARC Analyzer**, domain control, email deliverability management, and anti-spoofing enforcement

- **Sophos Email**, AI-powered email security covering phishing, spam, malware, and data loss prevention
- **Sophos Mobile**, unified endpoint management and security for iOS, Android, and Windows mobile devices
- **Sophos Phish Threat**, simulated phishing campaigns and security awareness training
- **Sophos Managed Risk**, vulnerability and attack surface management with expert-led prioritisation
- **Sophos Workspace Protection**, integrated security for cloud workspaces and SaaS environments
- **Sophos Switch and Wireless**, secure, centrally managed network switching and Wi-Fi infrastructure
- **Sophos Central**, the unified cloud-native management console across the entire Sophos portfolio and third-party integrations
- **Sophos Incident Response Services**, emergency-response and remediation services delivered by specialist threat experts

Sophos Review

Sophos holds exceptional standing across independent analyst and peer review platforms. In the 2026 Gartner Peer Insights Voice of the Customer for Managed Detection and Response, Sophos earned an overall rating of 4.8/5.0 based on 290 verified reviews, making it the most-reviewed vendor in that report with a 95% Willingness to Recommend score.

Separately, Sophos was named a 2026 Customers' Choice for Endpoint Protection Platforms for the fifth consecutive time, achieving the highest rating of 4.9/5.0 among all vendors in the Customers' Choice Quadrant based on 286 reviews.

mimecast Review

Mimecast holds a strong and well-documented position in independent peer review platforms. On Gartner Peer Insights, Mimecast's Email Security Platform carries a rating of 4.5 out of 5 based on 543 reviews (as of December 2024), and its Cloud Archive solution holds a 4.5 out of 5 based on 150 reviews. Reviewers consistently highlight the platform's ease of deployment, breadth of protection, strong Microsoft 365 integration, and responsive technical support. The platform's consolidated approach to email security and archiving is frequently cited as a key differentiator for mid-market and enterprise customers alike.

Commvault®

Company Overview

Commvault (NASDAQ: CVLT) is an American publicly traded cybersecurity and data protection software company, founded in 1988 as a specialised development group within Bell Labs and spun off as an independent company in 1996. Headquartered at 1 Commvault Way, Tinton Falls, New Jersey, the company operates 29 offices globally, with a presence across North America, Europe, the Middle East, Asia Pacific, and Latin America. Under the leadership of CEO and President Sanjay Mirchandani, the company has transformed from a traditional on-premises backup software vendor into a SaaS-first cyber resilience platform business.

The current flagship offering is Commvault Cloud Unity, launched at the company's Shift 2025 conference in November 2025, representing the next-generation evolution of the Commvault Cloud platform. Powered by Metallic AI, Cloud Unity is the industry's only cloud-native platform that unifies data security, identity resilience, and cyber recovery at enterprise scale. The platform incorporates technology from Commvault's 2024 acquisition of Clumio (\$47 million) and its Satori Cyber acquisition, adding cloud-native backup-as-a-service and identity management capabilities respectively.

Products and services

- **Commvault Cloud Unity**, the unified AI-powered platform combining data security, identity resilience, and cyber recovery across hybrid and multi-cloud environments
- **Metallic AI**, the AI engine embedded across the platform, delivering intelligent, autonomous data management, threat detection, and ResOps (Resilience Operations) automation

- **Backup & Recovery**, enterprise-grade protection of virtual machines, containers, databases, applications, endpoints, and files, on-premises and across multi-cloud
- **Clumio**, cloud-native Backup-as-a-Service (BaaS) for AWS and Google Cloud workloads, delivering fully managed, agentless SaaS data protection
- **Disaster Recovery**, orchestrated failover and failback capabilities with verified recovery, supporting hybrid, multi-cloud, and SaaS workloads
- **Ransomware Protection**, Detection & Recovery, AI-driven anomaly detection, clean room recovery, and immutable storage with integrated threat scanning
- **Identity Resilience**, real-time monitoring and protection of identity and access, inherited from the Satori Cyber acquisition and built into Cloud Unity
- **Data Governance & Compliance**, data classification, retention management, eDiscovery, and audit-ready reporting across structured and unstructured data
- **Commvault Cloud for Microsoft Azure & AWS Marketplaces**, consumption-based utility pricing models allowing flexible, cloud-marketplace-driven procurement
- **Managed Detection & Response (MDR) Integrations**, native connectors to SIEM, SOAR, and security tooling ecosystems for unified security operations

Commvault Review

Commvault has been named a Leader in the Gartner Magic Quadrant for Backup and Data Protection Platforms for the 14th consecutive year in 2025, placing it in an elite tier of sustained leadership in enterprise data protection. In the 2025 Gartner Critical Capabilities report, Commvault ranked highest in five of six evaluated use cases, namely Hybrid, Multicloud, SaaS, Data Services, and Disaster Recovery, and was the only vendor to score 4.0 or higher across all six use cases. It has additionally been named a Sample Vendor in the 2025 Gartner Hype Cycle for Data Security Technologies.
