Nutrient

Nutrient Company Overview

Nutrient, formerly PSPDFKit, is a document technology company founded in 2011 in Vienna, Austria, as a bootstrapped iOS Portable Document Format (PDF) software development kit (SDK) business, and now headquartered in Raleigh, North Carolina, with offices in England, France and Austria. Led by co-founder and CEO Jonathan Rhyne and backed by Insight Partners, the company consolidated PSPDFKit, ORPALIS, Aquaforest, Muhimbi and Integrify under the single Nutrient brand in 2024 and employs over 150 people across 29 countries.

Nutrient now positions itself as the document layer for AI agents, combining SDKs, hosted document APIs, Model Context Protocol (MCP) connections and workflow automation so organisations can extract, create, edit, compare, convert and redact documents with source evidence and human review built in. More than 3,000 organisations rely on the platform, including over 15 percent of the Global 500 and more than 130 public sector bodies, with over one billion document interactions a year. Named customers include Harvey, IBM, DocuSign, Sony, GSK, Lufthansa Systems and Red Bull, and the platform is SOC 2 (System and Organisation Controls) Type 2 audited and compliant with the General Data Protection Regulation (GDPR).

Products and Services

- **Web SDK**, browser-based PDF and Office document viewing, annotation, editing, forms and signing via WebAssembly.
- **Mobile SDKs**, native iOS and Android SDKs plus cross-platform options for building document features into mobile apps.
- **Backend and .NET SDKs**, server-side document processing, conversion, generation and Optical Character Recognition (OCR).
- **Document Engine**, self-hosted server for document processing, real-time collaboration and storage, including air-gapped deployment.
- **Document Authoring**, embeddable editor for creating and editing DOCX-style documents with agentic edit validation.
- **AI Assistant**, conversational AI for summarising, querying, translating and redacting documents inside applications.
- **AI Document Processing**, intelligent classification and extraction of data from structured and unstructured documents.

MobaXterm

MobaXterm Company Overview

MobaXterm is developed by Mobatek, a privately held software company based in Toulouse, France, that has been delivering products to a worldwide customer base since 2008 under managing director Guillaume Claudel. Its two main products, MobaXterm and MobaSSH, are aimed at corporate users working in mixed Unix, Linux and Windows server environments, with customers across aeronautics, space, defence, healthcare, banking, insurance, government and education.

MobaXterm positions itself as the all-in-one toolbox for remote computing on Windows, bringing Secure Shell (SSH), X11, Remote Desktop Protocol (RDP), Virtual Network Computing (VNC), File Transfer Protocol (FTP) and Unix commands into a single portable executable that runs without administrator rights or installation. Mobatek's design principles are an intuitive interface, no spyware or adware, rapid security fixes, try-before-you-buy licensing and easy deployment for system administrators. A free Home Edition sits alongside a Professional Edition at US$69 or €49 per user, which includes a lifetime right to use.

Products and Services

- **MobaXterm Home Edition**, free version with full X server and SSH support, remote desktop, remote terminal, X11 forwarding, automatic SFTP browser, master password protection and plugin support.
- **MobaXterm Professional Edition**, adds unlimited sessions, tunnels and macros, unlimited run time for network daemons, enhanced security settings, 12 months of updates and the right to deploy across the organisation.
- **MobaXterm Customizer**, Professional Edition tool for setting a corporate startup message and logo, modifying the profile script and removing unwanted games, screensavers or tools before deployment.
- **Embedded X server**, fully configured X.org based server with OpenGL support for displaying remote Unix and Linux applications on the Windows desktop.

- **DWS Processor API**, hosted Document Web Services (DWS) API for conversion, merging, OCR, watermarking and compression.
- **DWS Data Extraction API**, AI-driven extraction of structured data from PDFs, scans and Office files with source grounding and confidence signals.
- **DWS AI Gateway API**, governed routing of document tasks to the customer's chosen AI models.
- **DWS Accessibility API**, automated PDF remediation for PDF/UA (Universal Accessibility) compliance.
- **DWS Viewer API**, hosted document viewing without self-managed infrastructure.
- **Nutrient MCP Server**, MCP connections giving AI agents direct access to document tools.
- **Agent skills**, PDF-to-Markdown, Make PDF and Remediate PDF skills and command-line tools for agent workflows.
- **Enterprise Document Agents and Workflow Agents**, AI agents for governed, document-centric business processes (early access).
- **Nutrient Workflow**, formerly Integrify, process automation platform with Process Builder, Form Designer and Office Templating.
- **Microsoft 365 integrations**, Document Converter, Document Editor and Document Searchability for SharePoint and Power Automate, formerly Muhimbi.
- **Salesforce and ServiceNow integrations**, native document conversion, editing and signing inside both platforms.
- **GdPicture.NET and DocuVieware**, .NET imaging SDK and HTML5 document viewer, formerly ORPALIS.
- **PaperScan**, TWAIN and Windows Image Acquisition (WIA) scanning software with built-in OCR.
- **AvePDF**, online document processing application for conversion, compression, redaction and PDF/A archiving.
- **Aquaforest**, searchable PDF and OCR server tools for document archives.
- **Industry offerings**, packaged solutions for legal, tax and audit, construction, education, financial services, healthcare and government.
- **Support and services**, technical support, documentation, evaluation programmes and tailored workflow scoping.

- **X11 forwarding and display export**, remote displays exported to local Windows over encrypted SSH transport.
- **Tabbed SSH terminal**, PuTTY based terminal with antialiased fonts, macros, syntax highlighting and dark mode.
- **Versatile session manager**, SSH, Telnet, Rlogin, RDP, VNC, X Display Manager Control Protocol (XDMCP), FTP, SSH File Transfer Protocol (SFTP), Mosh (mobile shell) and serial connections in one interface.
- **Graphical SFTP browser**, opens automatically on SSH connection for direct editing of remote files.
- **SSH tunnelling**, secure port forwarding with a graphical tunnel manager.
- **Multi-execution**, runs the same commands across multiple servers simultaneously.
- **Unix commands on Windows**, Cygwin based bash, grep, awk, sed, rsync and other common tools.
- **Network daemons**, built-in Trivial File Transfer Protocol (TFTP), Network File System (NFS) and Cron services.
- **Remote monitoring bar**, live resource view of the connected remote server.
- **Plugins and add-ons**, extend MobaXterm with additional tools and Unix packages.
- **Portable and installer versions**, single executable that runs from a USB stick or a standard Windows installation.
- **MobaSSH**, SSH server for Windows aimed at corporate network environments.
- **Mobatek Labs**, free utilities including MobaLiveCD, MobaPhoto and MobaMotiv.
- **Licensing and support**, volume discounts, online customer area, full documentation and frequent beta releases driven by user feedback.

Nutrient Reviews

Nutrient holds a 4.4 out of 5 rating on G2 across 176 verified reviews spanning its portfolio, with 94 percent of reviewers awarding four or five stars. The flagship Nutrient SDK scores 4.7 out of 5, and in comparisons against iText by Apryse reviewers rated it 9.3 for ease of use, 9.5 for quality of support and 9.6 for breadth of components.

Reviewers repeatedly highlight an attentive and helpful support team, a fast and responsive PDF viewer, documentation described as clear and practical, and ready-made components for signatures and editing that competing SDKs lack. Several customers report using the product continuously for close to a decade, citing platform stability and immediate impact when automating document intake workflows.

MobaXterm Review

MobaXterm holds a 4.6 out of 5 rating on G2 across 110 reviews, scoring 9.5 for meeting requirements, 9.3 for ease of use and 9.4 for its command-line interface. In head-to-head comparisons reviewers found it easier to use, set up and administer than Microsoft Remote Desktop Services and TightVNC, and felt it met their business needs better. Users single out the way it keeps all RDP and SSH connections organised in one clean tabbed workspace, the ability to resume an idle session with a single click and the strength of its file transfer features.

On Capterra it scores 4.7 out of 5, with 4.9 for value for money, 4.8 for features and a 90 percent likelihood to recommend. Reviewers describe it as a Swiss Army knife for IT staff who log into multiple systems daily, praising

Nutrient G2 Reviews

graphical file transfers that remove the need for manual copy commands and an interface simple enough for non-technical users while still giving engineers depth.

maxon

maxon Company Overview

Maxon Computer GmbH is a German creative software company headquartered in Bad Homburg, near Frankfurt, founded in 1985 by Harald Egel, Uwe Bärtels and Harald Schneider and part of the Nemetschek Group since 2000. Led by Chief Executive Officer (CEO) Dave McGavran, the company has grown through the acquisitions of Redshift (2019), Red Giant (2020) and Pixologic, maker of ZBrush (2021), and operates offices in Germany, the United States and Japan.

Maxon builds 2D and 3D software for motion graphics, animation, filmmaking, digital sculpting, visual effects and product and architectural visualisation, bundled under the Maxon One subscription. Its tools have been used on games such as God of War Ragnarök, The Last of Us and League of Legends, films including Avatar: The Way of Water and Godzilla Minus One, and brand work for Nike, Volvo and Google. In 2026 the company pushed into broader access and new markets, launching Cinema 4D for iPad, relaunching Autograph free for individuals, adding Windows on Arm support and extending Redshift into architecture, engineering and construction (AEC) software such as Revit and Vectorworks.

Products and services

- **Maxon One**, single subscription bundling Cinema 4D, ZBrush, Redshift, Red Giant, Universe, Capsules and Cineversity training.
- **Maxon and Adobe bundles**, combined Maxon One and Adobe Creative Cloud subscriptions.
- **Cinema 4D**, the flagship 3D modelling, animation, simulation and rendering application, known for its MoGraph motion graphics toolset.
- **Cinema 4D for iPad**, touch-optimised mobile version with core 3D modelling and design capabilities.
- **Cinema 4D MCP Server**, Model Context Protocol (MCP) bridge connecting Cinema 4D to supported AI tools.
- **Redshift**, the first fully graphics processing unit (GPU) accelerated biased renderer, available for Cinema 4D, Maya, Houdini, 3ds Max, Blender and Katana.
- **Redshift for Architects**, real-time cinematic rendering inside architectural design tools including Vectorworks, Revit and Archicad.
- **Red Giant**, filmmaking and motion graphics tools including the Trapcode, Magic Bullet and VFX suites for Adobe After Effects and Premiere Pro.
- **Universe**, library of video transitions, effects and text animations for editors and motion designers.
- **Autograph**, motion graphics and compositing application with 2D, 3D and responsive multi-aspect design, free for individual users.
- **ZBrush**, industry-standard digital sculpting and painting software for character, creature and product design.
- **ZBrush for iPad**, mobile sculpting with Apple Pencil support.
- **Capsules**, library of intelligent assets, motion capture data, models, shaders, materials and presets.
- **Moves by Maxon**, iPhone-based facial and body motion capture that feeds directly into Cinema 4D.
- **Cineware**, Cinema 4D rendering integration for Adobe After Effects, Unreal Engine and other host applications.
- **Cinebench**, free industry benchmark for testing processor and system rendering performance.
- **Laubwerk**, 3D plant and vegetation assets for visualisation projects.
- **Cineversity and ZClassroom**, official online training platforms for Maxon products.
- **Educational licensing**, discounted and free licences for students, educators and institutions.
- **Teams programme and training partners**, multi-seat licence management for studios and an accredited training network.

Maxon Review

Cinema 4D holds a 4.6 out of 5 rating on G2 across 137 reviews, scoring 9.0 for meeting requirements, and reviewers rate it ahead of several competing 3D tools for meeting business needs and quality of support. Users consistently describe it as the most user-friendly professional 3D package available, praising its MoGraph tools, stability, extensive presets and seamless integration with Adobe After Effects.

ZBrush performs even more strongly with 4.7 out of 5 from 104 G2 reviews, scoring 9.2 for meeting requirements and 9.0 for product direction, while Software Advice rates Cinema 4D 4.6 out of 5. Reviewers highlight the breadth of modelling, animation, rendering and motion graphics capability in one environment as the reason so many studios standardise on Maxon tools.
