Company Overview

Square 9 Softworks is a US based enterprise software company headquartered at 127 Church Street, New Haven, Connecticut, specialising in intelligent document processing and information management. Founded in the early 2000s within New Haven's historic 9th Square District, the company has grown into a leader in AI powered document capture, extraction and workflow automation, employing around 65 to 75 staff and generating an estimated USD 15.8 million in annual revenue. Today, Square 9 positions itself as an Intelligent Document Processing (IDP) vendor, helping organisations eliminate paper based workflows by using AI driven data extraction to capture, classify and route business content across systems such as Microsoft Dynamics and other enterprise applications.

Products and Services

- **GlobalCapture**, document capture automation software that uses AI powered OCR to accurately scan, classify and validate high volumes of paper, PDF and email documents.
- **GlobalSearch**, an enterprise content management (ECM) platform providing centralised, secure, permission based document storage with instant search and retrieval.
- **GlobalForms**, dynamic web forms software for creating and managing electronic data collection forms that replace paper based intake processes.
- **Accounts Payable Automation**, an AI driven solution that extracts data from vendor invoices and receipts and automates the full payables workflow, including deep integration with Microsoft Dynamics.
- **Professional Services**, a dedicated digital transformation team offering implementation, consulting and support to help organisations maximise the value of their Square 9 deployment.
- **Intelligent Information Management Platform**, the overarching AI powered platform that ties document capture, storage and graphical workflow automation together into a single searchable repository.

Company Overview

Redstor, headquartered in Reading, England, is a well-established provider of cloud data backup, recovery and cybersecurity services, founded in 1998 and now trading under the CyberSentry banner following a 2025 buyout backed by Bregal Milestone. The company protects data for more than 40,000 clients through a network of hundreds of partners and managed service providers worldwide, with a track record of over 200 million backups and zero data loss in more than two decades of operation. Today, Redstor positions itself as a unified cybersecurity and data protection platform, moving beyond traditional backup into malware detection, disaster recovery and cloud-native data management for both MSPs and internal IT teams. Led by CEO James Griffin, the business emphasises rapid, hardware-free recovery and machine-learning-driven innovation as core pillars of its current strategy.

Products and Services

- **Cloud backup and recovery**, covering servers, endpoints, Microsoft 365, Google Workspace, Salesforce, Azure VMs and Azure Blob Storage.
- **InstantData technology**, allowing files or entire sites to be streamed and accessed instantly without waiting for full restores.
- **AI-powered malware detection**, providing a second layer of protection to ensure backups and recoveries are free from threats.
- **Immutable storage**, keeping data in an unmodifiable, offline state until it is no longer required by the data controller.
- **Disaster recovery and cloud archiving**, supporting VMware and Hyper-V environments alongside long-term data retention.
- **Data sovereignty support**, enabling region-based data processing and storage to help meet regulatory requirements.
- **Extensible APIs**, file sync and share, and centralised management through a single web-based control centre known as the RedApp.
- **Flexible retention policies**, allowing customers to keep data for 12 months, seven years or indefinitely to meet governance needs.

Square9 Review

Square 9 has built a strong reputation for customer satisfaction, earning a 4.5 out of 5 star rating across 172 verified reviews on G2, where it is recognised as a leader in the document management category. On Gartner's own review platform, Square 9 has accumulated 127 customer reviews, contributing to high ranking placements on Gartner's 2024 Document Management, Contract Management and Forms Management shortlists. Customers frequently highlight the company's responsive and knowledgeable support team, along with tangible time savings from OCR based document scanning, with one reviewer noting the platform helped process close to 300 documents daily.

Redstor Review

Redstor is well represented on Gartner Peer Insights, where it is benchmarked directly against major backup and data protection vendors such as Dell Technologies in the Backup and Data Protection Platforms category, reflecting its standing among enterprise-grade competitors.

For a broader and more active pool of feedback, G2 is the strongest source, with Redstor's Microsoft 365 backup product holding a 4.6 out of 5 rating across 111 reviews, and the wider CyberSentry portfolio (which now encompasses Redstor's backup and archiving lines) rated 4.6 out of 5 across 391 reviews.

Customers consistently highlight ease of use, straightforward granular recovery for SharePoint and Teams data, and strong ratings for meeting requirements, ease of setup and quality of support, all scoring above 9 out of 10 on G2's detailed metrics.

Company Overview

DataSnipper is an Amsterdam-headquartered software company that has grown into a global leader in intelligent automation for the audit and finance profession, best known for its Excel-native platform that lets professionals extract, cross-reference and validate data directly within their spreadsheets.

Founded in 2017 by Maarten Alblas, Jonas Ruyter and Kai Bakker, DataSnipper is now led by CEO Vidya Peters and employs roughly 265 people out of its Amsterdam headquarters, with a second office in New York opened in 2023 to serve its growing US customer base.

The company became the first EU unicorn of 2024 after closing a USD 100 million Series B round led by Index Ventures with participation from Insight Partners and Rabobank, pushing its valuation past USD 1 billion. Today the platform is used by more than 500,000 audit and finance professionals in 175 to 175+ countries, is trusted by Fortune 500 companies, government agencies and all Big Four accounting firms, and has repositioned itself from a simple Excel add-in into a full "Intelligent Automation Platform" powered by AI Agents. DataSnipper has also embedded sustainability into its identity, committing 1% of annual revenue to environmental non-profits through a partnership with 1% for the Planet.

Products and services

- **Intelligent Automation Platform**, DataSnipper's core Excel-native workspace for audit and finance teams.
- **Advanced Document Extraction**, AI-powered extraction of data from over 20 document types including invoices, receipts, contracts and passports, with confidence-level scoring for each field.
- **Invoice, Receipt and Contract Extraction modules**, purpose-built tools that pull key fields such as totals, transaction dates, effective dates and jurisdictions with a single click.
- **Cross-referencing and validation tools ("Snips")**, which create traceable links between source documents and figures directly inside the Excel workbook.
- **Advanced Extraction Suite and Cloud Collaboration Suite**, two newer product suites launched to expand AI-driven extraction and enable secure, cloud-based team collaboration.
- **AI Agents**, automation layers that reduce manual work, accelerate document and data analysis, and free up professionals for higher-value judgement and analysis.

DataSnippet Review

DataSnippet holds a strong reputation among users, reflected in a 4.8 out of 5 star rating across 219 verified reviews on G2, where reviewers particularly highlight its Excel-native workflow and time savings on audit procedures.
