

New Additions for the Week 12 January - TOP STORIES #149

Here are the Vendors for the week, and for a full list of Vendors already transacting with us on the Marketplace, they [can be found here](#)

wonde

Company Overview

Wonde is a UK-based edtech company founded in 2015, specialising in cloud-based school data management solutions that securely sync student, teacher, and parent data from school Management Information Systems (MIS) to third-party learning applications. The platform serves over 30,000 schools across 60+ countries, managing data for 35 million individuals and integrating with 600+ edtech apps. It emphasises simplicity, security, and compliance, with ISO 27001 certification and features like audit trails and data backups.

Products and Services

- **Core Data Sync Platform:** Seamlessly integrates with 35+ MIS/SIS systems to extract, store, and share accurate, up-to-date school data (students, staff, parents) with edtech apps via API, enabling real-time updates and single-point management.
- **MyLogin (SSO Solution):** Provides single sign-on access to apps like Google Workspace and Microsoft 365 using one set of credentials; supports magic badges (QR codes), emojis for students, and customizable branding for easy, secure logins without passwords.
- **EduSync (Automated Provisioning):** Automates user lifecycle management by syncing MIS data to platforms like Google Workspace, Microsoft Entra ID (Azure AD), and Apple School Manager; handles onboarding, updates, group/classroom assignments, and offboarding to reduce admin workload and enhance security.
- **App Directory and Integrations:** Offers a directory of 600+ pre-integrated edtech apps; enables developers to connect instantly to thousands of schools with secure, compliant data access.
- **Security and Compliance Tools:** Includes data filtering, subject access requests, sub-processor transparency, 99.95% uptime SLA via AWS, business continuity under ISO 27001, and full audit trails.
- **Support Services:** Provides onboarding, API documentation, global expert support, MIS migration assistance, and multi-school group controls.

Wonde Review

Solution-Soft

Company Overview

Solution-Soft Systems, Inc., founded in 1993 and headquartered in Santa Clara, California, specialises in virtual clock and time travel testing software solutions. The company pioneered its flagship product, Time Machine, in 1997, enabling organisations to simulate future or past dates for application testing, which has accelerated project delivery by 3-10 times for thousands of customers, including 47 Fortune 100 firms across sectors like finance, government, and manufacturing.

Products and Services

- **ITime Machine:** Core virtual clock software for date/time simulation in applications, supporting time travel at variable speeds for QA, compliance, and future-dating testing on traditional systems.
- **Time Machine for Containers (TMCON):** Extends testing to containerised environments like Docker, Kubernetes, and OpenShift, handling large-scale clusters (e.g., 16,000+ CPU cores) to reduce testing cycles by up to 60 times.
- **Time Machine Sync Server (TMSS):** Synchronises time across distributed systems, servers, and databases; latest updates include pause/resume for enhanced control in complex testing scenarios.
- **Time Machine Enterprise Management Console (TMEMC):** Centralised dashboard for managing virtual time testing across enterprises, including monitoring and configuration.
- **Time Machine Floating License Server (TMFLS):** Enables shared license pooling for cloud or enterprise deployments, automating allocation for scalability.
- **Frameworks:** Specialised adapters like TMFO (Oracle), TMFSQL (SQL Server), TMFWS (WebSphere), TMFWL (WebLogic), and TMFJB (JBoss) for seamless integration with enterprise databases and app servers.
- **Services:** Partnerships with Accenture, Deloitte, IBM, Microsoft, Oracle, and Red Hat for cloud migration, DevOps, test automation, and test data management; custom support for SAP, mainframes, and financial services testing.

Solution-Soft Review

Customer testimonials on the company site highlight strong satisfaction, such as Atruvia AG reducing 6 months of testing to 3-4 days, and endorsements

Wonde receives positive feedback for simplifying data management and SSO in schools, with testimonials highlighting reliable integrations and time savings, such as from Times Tables Rock Stars. Clever's blog highlights Wonde's strengths in automating data syncing from MIS to over 600 apps, reducing admin burdens, and offering secure handling with ISO 27001 compliance; schools praise its "set-it-and-forget-it" reliability and user-friendly interface for permissions.

ninjaOne®

Company Overview

NinjaOne provides a unified endpoint management platform designed for IT teams and MSPs to automate monitoring, patching, and security tasks. Founded in 2013 and headquartered in Austin, Texas with over 2,000 employees, the company serves more than 30,000 customers and achieved over \$500 million in annual recurring revenue in 2026.

Products and services

- **Remote Monitoring and Management (RMM):** Offers real-time endpoint monitoring, automated alerting, custom scripting, software deployment, and network discovery across Windows, macOS, and Linux devices for proactive issue resolution.
- **Patch Management:** Automates OS and third-party application updates with testing, scheduling, and compliance reporting to minimise vulnerabilities and downtime.
- **Endpoint Backup:** Provides secure, automated backups for endpoints, servers, Microsoft 365, and Google Workspace with ransomware protection, granular recovery, and compliance tools.
- **Remote Access:** Delivers one-click, secure remote sessions using integrations like AnyDesk or Splashtop, with screen sharing and file transfer for quick support.
- **Mobile Device Management (MDM):** Manages iOS, Android, and iPadOS devices with policy enforcement, app deployment, and real-time visibility.
- **Automation and Scripting:** Enables scheduled or threshold-based automations for tasks like disk cleanup, maintenance, and multi-step workflows to save time.
- **IT Asset Management:** Tracks hardware, software licences, warranties, and usage with automated discovery and change alerts.
- **Security and Compliance:** Includes threat detection, CIS benchmarks, ransomware rollback, and audit tools for endpoint protection.
- **Ticketing and Integrations:** Automates context-rich ticketing and integrates with PSA tools, security platforms, and more for streamlined operations.
