Company Overview

TeammateApp (trading as Teammate App Ltd) is a privately held SaaS company specialising in ISO compliance and HSEQ (Health, Safety, Environment & Quality) management software, with over a decade of operational experience in the compliance technology space. The platform was formally registered as a New Zealand limited company in August 2022 (NZBN: 9429050771240) and is built on secure Amazon Web Services (AWS) infrastructure, supporting organisations across construction, manufacturing, healthcare, professional services, agriculture, and the food industry globally.

Today, TeammateApp operates as a fully cloud-native, all-in-one HSEQ platform that centralises compliance workflows, risk management, auditing, training, and contractor management within a single, scalable environment. The platform is subscription-based on rolling monthly terms, includes a data migration and onboarding service, integrates with Xero, and is accessible via a dedicated mobile application on Android, making it equally suited to field-based and office-bound compliance teams.

Products and Services

- **ISO 9001 Quality Management**, end-to-end quality compliance and process control
- **ISO 14001 Environmental Management**, regulatory environmental tracking and reporting
- **ISO 45001 Occupational Health & Safety**, hazard identification, risk controls, and H&S workflows
- **ISO 27001 Information Security Management**, access controls and data governance compliance
- **ISO 22000 Food Safety Management**, traceability and food safety regulatory alignment
- **Document Control**, version-controlled documentation with role-based secure access
- **Audit & Inspection Management**, scheduling, fieldwork, findings, and corrective action tracking
- **Risk Assessment**, visual risk heatmaps, risk identification, evaluation, and mitigation tools
- **Competency & Training Management**, e-learning support, certification tracking, and scheduled training

Company Overview

BCC (Business Collaboration Company) GmbH is a privately held, family-owned enterprise software company founded in 1996 by Olaf Börner in Frankfurt am Main, Germany. Headquartered today in Eschborn in the greater Frankfurt area, with an international subsidiary, BCC Ltd., operating from London since 2014, the company employs approximately 40 to 70 staff and generates annual revenues estimated at around \$7 million. Over nearly three decades, BCC has served more than 800 corporate clients, sold over 8 million licences, and developed a global network of 30 partners, earning a reputation as one of the foremost independent specialists in HCL Domino governance and Microsoft 365 cloud transformation. In 2025, BCC further consolidated its Microsoft 365 market position by acquiring nubit. GmbH.

What began as an IBM/Lotus Notes consultancy systematically evolved into a full-suite software vendor through targeted acquisitions, including Notes Development GmbH (2004), MailProtect (2005), and Icodex Software AG (2007). The company's strategic pivot to Microsoft commenced in 2016, with BCC presenting its Microsoft solutions at Ignite in 2018, followed in 2019 by Gartner's verification and recommendation of BCC MigrationEngine as one of the leading mail migration solutions. In 2020, Microsoft formally endorsed BCC MigrationEngine as 'Best in Class' for Domino-to-Microsoft migrations, and 2022 delivered BCC's best financial results in its history. Today, BCC positions itself as a trusted, independent advisor bridging legacy HCL Domino infrastructure and the modern Microsoft 365 cloud, a claim underscored by its landmark migration of over 180,000 Bundeswehr (German armed forces) mailboxes without a single error.

Products and Services

- **BCC MigrationEngine for Mail**, server-based, automated, GDPR-compliant migration of emails, calendars, tasks, and contacts; supports HCL Domino to Office 365/Exchange, Exchange to Domino, Exchange to Exchange/M365, and M365 to Google Workspace
- **BCC MigrationEngine Analyse**, pre-migration analytical tooling covering mailbox sizing, attachment profiling, encrypted email analysis, and scenario modelling
- **BCC Affirmatic**, Microsoft 365 lifecycle management and governance platform with self-service workflows for Teams, Groups, and guest user management
- **BCC Copilot Connector**, unlocks legacy HCL Domino data for use with Microsoft Copilot

- **Contractor & Supplier Management**, onboarding, performance monitoring, and compliance verification
- **Asset Management**, centralised asset information and lifecycle tracking
- **Chemical & Safety Data Management**, storage location monitoring and safety data sheet management
- **Action Management**, organisation-wide corrective and preventive action (CAPA) tracking
- **Visitor & Employee Registration**, site access management for visitors, contractors, and staff
- **Custom Form Submission**, tailored form templates for business-specific data capture
- **Reporting & Analytics Dashboard**, real-time compliance dashboards for internal and stakeholder reporting

Your Sales Specialist is: [Taryn Fonseca](#)

- **BCC Coexistence Gateway**, mail routing and free/busy calendar coexistence support during Domino-to-Exchange/M365 transition phases
- **BCC DominoProtect**, real-time security and compliance enforcement for HCL Domino, preventing unauthorised changes
- **BCC MailProtect**, enterprise email security, secure messaging, and compliance in a single platform
- **BCC ActiveArchive**, browser-based archiving of HCL Notes applications with transformation for downstream target systems
- **BCC DBTool**, 360-degree Domino database management and monitoring
- **BCC Domino Analyser**, detailed data management and security analysis across Domino mail and application environments
- **BCC ClientGenie**, HCL Notes client administration, deployment, and lifecycle management
- **BCC Charon**, modular, scalable Unified Messaging platform for HCL Domino
- **Professional Migration Services**, end-to-end project delivery including pre-migration analysis, execution, and post-migration validation

Teammate Review

TeammateApp is listed and reviewed across leading independent software review platforms, with consistently positive feedback centred on the platform's ease of use, comprehensive ISO coverage, and the clarity it brings to previously manual compliance processes. Reviewers across industries frequently highlight the intuitive audit documentation workflow, from planning and fieldwork through to corrective action reporting, as a standout feature that significantly reduces audit preparation time. The platform's scalability from SME to enterprise, combined with its rolling monthly subscription and included data migration, is cited as a major differentiator over more rigid, contract-heavy competitors.

BCC Review

BCC MigrationEngine carries two of the most significant independent endorsements available in this specialist niche: Gartner's 2019 verification and recommendation of BCC MigrationEngine as one of the leading mail migration solutions, and Microsoft's 2020 designation of the platform as 'Best in Class' for HCL Domino-to-Microsoft migrations. Customer testimony reinforces this standing, with Teradyne (6,500+ employees globally) on record stating: *"Using BCC tools, our migration project was within budget with no regrets. A resounding success!"* The Bundeswehr's error-free migration of 180,000 mailboxes stands as one of the most operationally demanding deployments in the industry.

Given BCC's profile as a specialist, family-owned European B2B vendor, the richest and most consistently positive collection of verified customer references, case studies, and partner testimonials is hosted directly on the BCC website. For the most comprehensive and positive peer experiences across the BCC product portfolio, visit the BCC customer references page directly:

Company Overview

Figma, Inc. (NYSE: FIG) is a publicly listed, cloud-native collaborative design platform founded in 2012 by Dylan Field (CEO) and Evan Wallace while studying computer science at Brown University, Providence, Rhode Island, and headquartered at 760 Market Street, San Francisco, California. Originally conceived to make creative tools universally accessible in a browser, Figma publicly launched in September 2016 and fundamentally redefined the product design industry by introducing real-time multiplayer collaboration long before such capabilities were standard practice. After a high-profile \$20 billion acquisition bid by Adobe was mutually abandoned in

December 2023 following regulatory opposition from the European Commission and the UK Competition and Markets Authority, Figma pursued an independent course and listed on the New York Stock Exchange in July 2025 under the ticker symbol FIG, with shares more than tripling the IPO price on opening day, valuing the company at \$56.3 billion.

Today, Figma employs approximately 1,886 people globally and has grown into one of the most valuable design software companies in the world. In Q4 of fiscal year 2025 (ending 31 January 2026), the company reported quarterly revenue of \$303.8 million, representing 40% year-over-year growth, with customers spending \$100,000 or more annually growing 47% year-over-year. The company has dramatically expanded its product footprint beyond its core design tool, launching four new products at its annual Config 2025 conference in May 2025, and adding AI-powered creative capabilities through the October 2025 acquisition of Israeli AI startup Weavy, subsequently rebranded as Figma Weave, positioning the platform as an end-to-end environment covering the entire product development lifecycle from ideation to production.

Products and Services

- **Figma Design**, the core collaborative interface design and prototyping tool for building digital products, websites, and apps
- **FigJam**, an online interactive whiteboard for brainstorming, diagramming, and real-time team collaboration
- **Dev Mode**, a developer handoff environment bridging design and code with inspect tools, code snippets, and asset export
- **Figma Slides**, a co-creation tool for building and delivering interactive presentations with collaborative editing
- **Figma Sites**, an AI-assisted website and web app builder enabling designers to publish responsive sites directly to production
- **Figma Make**, an AI-powered prompt-to-code tool (powered by Anthropic's Claude 3.7) that converts written descriptions or existing designs into working prototypes and applications
- **Figma Draw**, an advanced vector illustration tool with professional brushes and editing capabilities rivalling Adobe Illustrator
- **Figma Buzz**, an AI-enhanced marketing content creation tool for producing brand-consistent assets at scale
- **Figma Weave**, an AI-powered image and video editing suite for creative workflows, integrated following the October 2025 acquisition of Israeli startup Weavy
- **Figma Community**, a platform for sharing, discovering, and adapting design assets, templates, and plugins across the global user base
